SUMMARY

Passionate B.Tech CSE student at BML Munjal University, developing skills in Full Stack Web Development with a focus on the MERN Stack. Proficient in C++ and digital design using Figma and Canva, with an interest in exploring 3D art with Blender. Embraces a balanced lifestyle, finding inspiration in poetry and maintaining fitness. A collaborative team player with a knack for problem-solving, driven by authenticity and purpose. Eager for meaningful collaborations and knowledge-sharing opportunities.

EXPERIENCE

Design Intern

May 2024 - Present

ACIC - BMU Foundation

- Produced digital and print creatives, including social media posts, banners, brochures, etc., showcasing versatile design skills.
- Collaborated with marketing team to ensure adherence to branding guidelines and understand target audience preferences.
- Utilized Figma and Canva to create impactful visual assets, contributing to the Foundation's marketing efforts and brand identity.

PROJECTS

ChatGPT Clone | *MongoDB, Express.js, React.js, Node.js, RapidAPI*

- Developed a ChatGPT clone with the MERN stack, featuring a responsive interface and real-time messaging for an interactive user experience.
- Integrated RapidAPI for scalable API connections, and implemented secure user authentication and session management.

QuickBite | *MongoDB, Express.js, React.js, Node.js*

- A modern food ordering platform, using the MERN stack, providing a responsive and intuitive user interface for a smooth user experience.
- Enabled real-time cart updates and order placement, alongside a visually appealing design ensuring a delightful and user-friendly interface.

TownTies | *Javascript, Node.js, Express.js, MongoDB*

- Dynamic marketplace platform.
- Implemented user authentication, forum creation, discussion board, and product listings with image uploads using Multer and Cloudinary services, delivering a comprehensive and interactive user experience.

WanderLust | *Javascript, Node.js, Express.js, MongoDB*

- Vacation rental platform inspired by Airbnb.
- Users can create and manage vacation place listings with few information such as location, description, and price.
